DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 8, 11 – 14, and 16 - 23, drawn to communication of data to a node with a particular storing arrangement classified in class 370, subclass 429.
- II. Claim 9, drawn to reducing the number of data retransmissions due to data errors by CMI-encoding data, classified in class 370, subclass 535.
- III. Claim 10, drawn to increasing the reliability of communication of the token, classified in class 370, subclass 450.
- IV. Claim 11, drawn to synchronizing clock information, classified in class 370, subclass 350.
- V. Claim 15, drawn to allow data input of different bit number, classified in class 370, subclass 546.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as communication of data to a node with a particular storing arrangement, invention II has separate utility such as reducing the number of data retransmissions due to data errors by CMI-encoding data, invention III has a separate utility such as increasing the reliability of communication of the token, invention IV has a separate utility such as synchronizing clock information, invention V has a separate utility such as allowing data input of different bit number. See MPEP § 806.05(d).

Art Unit: 2667

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV, or V, the search required for Group II is not required for I, III, IV, or V, the search required for Group III is not required for I, II, IV, or V, the search required for Group IV is not required for I, II, III, or V, and the search required for Group V is not required for I, II, III, or IV, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert G. Weilacher on October 7, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew M Waxman whose telephone number is (703) 305-8086. The examiner can normally be reached on 9:00 - 5:30.

Art Unit: 2667

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on (703) 305-4378. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4700.
